

Are you ready...
for that SkinViva feeling?

skin**Viva**
Love your look.

Feel good about yourself.

At SkinViva, it's what we're all about - helping you to look and feel your best, whatever your age.

What people see on the outside often doesn't reflect how you feel on the inside. So our doctors use their aesthetic skills to expertly enhance what nature has given you, revitalising your skin to help you feel radiant, glowing and full of energy. That's how we want you to feel after every visit to SkinViva.

SkinViva is different.

Here's how...

We offer a comprehensive range of treatments to enhance your natural looks. Here at SkinViva, we take a fresh approach:

It all starts with YOU. Rather than just administer treatments, we'll spend time understanding who you are, how you want to feel so that we can skilfully tailor our range of treatments to achieve the look you want.

All our skin treatments are undertaken by fully qualified doctors who specialise in aesthetics. As well as being highly skilled, each has been specially selected for their natural aesthetic talent and warm, approachable manner.

skinViva
Love your look.

Feeling fabulous.

At SkinViva we know how important it is to get the natural look you want and to feel really good about yourself. We also know how easy it is to get it wrong. That's why we take a thoroughly professional approach before, during and after your treatment.

The secret from the start is to understand how your skin can change over time and the effects it has. Rather than looking at individual lines and features, we focus on the whole face. We'll talk to you about the results you want - such as 'less of a jowl', or 'a fresher look' - instead of individual treatments. Then we'll look at how best to achieve that using our specialist expertise.

starts here...

During your treatment, our doctors will use their skill and in-depth knowledge of the science of beauty to make small, natural-looking changes that make a big overall difference. This is based on the 'blink concept'; the way our brains subconsciously process small details into an overall picture instantly. Essentially it means your friends may notice you looking well, but not notice exactly what's changed.

We don't stop after you've completed your treatment either; we'll always make sure you're happy with the results in the longer term and can advise you on maintaining a look you'll love every day.

Experts in looking and feeling great.

Here at SkinViva we've spent eight years building an industry-leading team of aesthetic doctors. Through our Training Academy we have selected the best and brightest of the hundreds of trainees we meet each year. As part of the Allergan Medical Institute, we believe we have collectively reached the highest international standards in advanced injectable procedures.

Our doctors work, train and collaborate with each other to constantly improve. We know true job satisfaction only comes from delivering the best possible results for every person we treat. We love getting to know the clients we treat - but what we love most of all is seeing how our treatments help them become happier and more confident, making the most of life.

Our area of expertise is a science, but also an art. Our doctors believe in chasing that last 1% of excellence, always striving to get the best results - the result that will make you truly happy.

Just as dedicated as our doctors, the rest of our team is here to put you completely at ease and make sure everything goes smoothly at every stage.

When you look in the mirror, what do you see...?

Would you like a fresher, younger, more attractive look?

Is it about having more confidence or even just removing a single line or blemish?

Whatever you want, we've a treatment that works for you.

UPPER

Shadows under the eyes that make me look tired and worn out.

You need tear trough rejuvenation... gentle injections under the eyes that reduce hollows. Sometimes combined with strengthening of the upper cheek for best results.

Lines on my forehead that look like I'm frowning... and crow's feet.

You need upper face anti-wrinkle injections... a series of ultra-fine injections to help skin appear smoother, tighter and more rested. Lasts 3 to 4 months.

I look tired even though I'm not, with saggy eyebrows and crow's feet.

You need an eyebrow lift... fine injections above the brows that lift and smooth the surrounding area. Lasts 3 to 4 months.

Shadows around the temples that show the shape of the bone underneath.

You need temple hollow rejuvenation... dermal filler injections to replace the lost volume that causes that gaunt and skeletal look.

MIDDLE

My cheeks have flattened, and the high point's lower than I'd like.

You need cheek augmentation... an injectable volumiser that adds fullness to areas that need support, giving your face a softer, more youthful appearance.

I'd like my nose to be straighter, or to have more definition, shape or symmetry.

You need non-surgical nose re-shaping... advanced dermal filler techniques to improve the shape of your nose and adjust the balance of your face, without the extremes of surgery.

Lines or deep creases run from the corners of my nose down to the corners of my mouth.

You need nose-to-mouth lines restoration... a fine injection that replaces lost hyaluronic acid to fill creases and make your skin smoother, soft and toned. Can last up to 15 months.

LIPS

I'd like fuller and better shaped lips.

You need lip enhancement... our signature Da Vinci lip technique subtly enhances and restores the fullness and shape of your lips to bring out natural-looking beauty. We use the key principles of the 'golden ratio' to address the definition, balance and symmetry of your lips for incredible results lasting up to 1 year.

LOWER

My jaw line is soft and poorly defined or not as straight as it was.

You need jaw line & jowls re-shaping... anti-ageing injections to redefine your jaw and neck for a more youthful, tighter, more contoured look without surgery.

A weak chin, with less volume than it had and a shadow in the line.

You need chin augmentation... a combination of treatments to quickly add definition, balance and symmetry without surgery or to soften chin lines.

A crease at the corner of my mouth runs towards my chin, making me look sad.

You need mouth-to-chin lines restoration... carefully-placed dermal fillers that quickly give a smoother, more youthful look to skin that's lost elasticity through ageing, sun damage or weight loss.

Less defined lips, with fine lines around them.

You need upper lip lines restoration... a series of very fine dermal filler injections to improve the shape of the upper lip border and vertical upper lip lines.

KARRIE'S STORY

“My husband says I look 10 years younger.”

Back story

Although I've been interested in these treatments for a long time, I was worried about allergic reactions and the results. In the end my sister and her friends had treatments with SkinViva and told me how good they were. I could also see for myself the results were brilliant!

What made you go ahead?

When I spoke with the SkinViva doctor, he seemed so much more experienced than the other companies I'd spoken to, his knowledge was amazing and I really trusted him. He spent time reassuring me, explaining things to me in detail and answered all my questions. He completely put me at ease about the low risk of a reaction.

Before

After

What concerns did you have?

I have thin skin and was concerned with fine lines especially around my eyes and frown lines. I just wanted to look fresher, not different.

The treatment experience

Before the treatment I was excited but apprehensive. As soon as I was with the doctor I was put at ease and the treatment was much more comfortable than I expected. It helped that the doctor was really easy to talk to.

Tell us more about the results

I'm so pleased with the results - I've had so many compliments. I still look natural and so fresh. Friends who told me not to have the treatment have now booked in after seeing me! I feel so much more confident and happy.

At first my husband said "What are you having that done for?"... now he says I look 10 years younger! He can see that it has not changed me, I just look fresher.

Eyebrow arch lift from £239

Crows' feet from £169

Nose to mouth lines from £245

Lip enhancement from £269

Doctor's comments

Karrie is a great canvas to work with, she had some early signs of ageing particularly around her eyes, a few shadows around her mid face as well as very subtle loss of definition of her lips and volume loss around her chin. She also had a subtle frown line, which sometimes made it look like she was frowning when she wasn't.

In terms of Karrie's treatment I did some subtle revolumisation of her cheeks and chin, which helped lift the mid shadow on the corner of her nose; by treating the frown line she also got a lovely, subtle eyebrow lift. By adding a bit of definition to the lips, we've increased the shape of the cupid's bow. Particularly I think it was the shadows around the eyes that made the big difference to highlight Karrie's natural beauty.

“I still look natural but so fresh.
I feel so much more confident and happy.”

VIVIENNE'S STORY

“I look flawless I feel amazing!”

Back story

I had a treatment a few years ago with another company but was not happy with the results and left me very badly bruised which put me off until now.

What made you go ahead?

My manager at work and her friends had all been to SkinViva for treatments, I could see that none of them had any problems and all looked so much better. So I thought, I'm not getting any younger - why not?

I wanted to look younger, especially under my eyes. I wanted to look firmer, more youthful and fresher.

I booked a consultation and was amazed at the difference in service straight away. You could tell just by booking in with the girls on the phone that they were passionate about what they do.

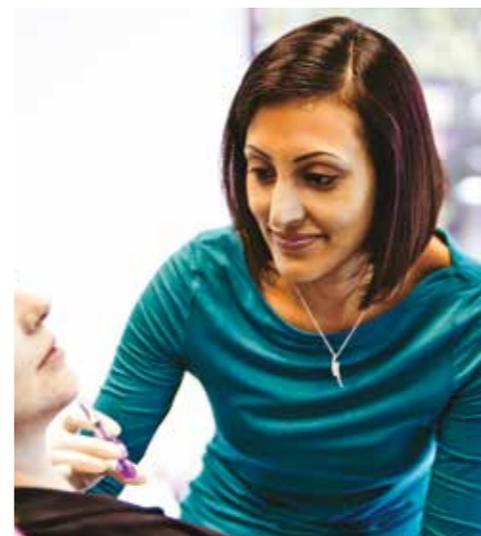

Before

After

What concerns did you have?

In my consultation the doctor asked me if I had considered having my lips done. This was the one treatment that I thought I would never have done. You always see so many bad jobs / massive lips on the TV. However I was so confident in the company and doctor that I trusted she would know best and do it well. She showed me lots of pictures of bad jobs (not by them) and good jobs (by them) to reassure me.

I didn't tell anyone that I was having the treatment as I thought they might put me off.

The treatment experience

As soon as I met the doctor, I felt that I was in safe hands. The consultation was so in depth. She explained everything so well. I had so many questions to ask but by the end of the consultation, she had already answered them all. By the time it came to having the treatment, I was not worried at all, just excited. I felt so safe.

Fine lines from £169

Tear troughs from £595

Upper lip lines from £189

Tell us more about the results

The results are even better than I could have imagined. So fresh, so natural. Just a fresher, plumper me. I look flawless. The treatment under my eyes has taken years off me and I am so glad I had my lips done. No one could tell! Everyone says I am glowing, well, that my make-up looks great. No one can tell that it's filler as it looks so natural.

Doctor's comments

Viv is a very attractive lady with beautiful eyes that were held back by what she describes as shadows under her eyes and some fine lines. So we treated those with a combination of wrinkle relaxant and dermal filler and got this fantastic result which you can see. We've also done a little bit of work on her top lip to soften lines and to create more definition around the cupid's bow as well as revolumising around the chin and cheeks to give her that youthful fullness back.

“...the best thing...? No one could tell! Everyone says I look great.”

KAREN'S STORY

“I’m so happy with the results, my face looks smoother, healthier and fresh!”

Back story

Having gone through a divorce I lost weight which resulted in me losing volume from my face. I wanted to look younger or better for my age but I was concerned about it going wrong. You see good and bad results.

What made you go ahead?

I found out about SkinViva at my local salon. I could see what great results some of the girls had!

What concerns did you have?

I wanted to look younger and replace the volume around my eyes and cheeks. I also liked the idea of looking more youthful all over, rather than one area being noticeably treated.

The treatment experience

As soon as I met the SkinViva doctor any worries I had were taken away. It was clear they are real experts at what they do, which is very important to me. The doctor was lovely and put me at ease. He was very knowledgeable and confident. The clinic was very nice and I felt very relaxed and welcomed. He used a numbing cream so I could hardly feel a thing.

“Everyone keeps saying to me you look well or your skin looks glowing.”

Crow's feet from £169

Under eye hollows from £595

Cheek shaping from £269

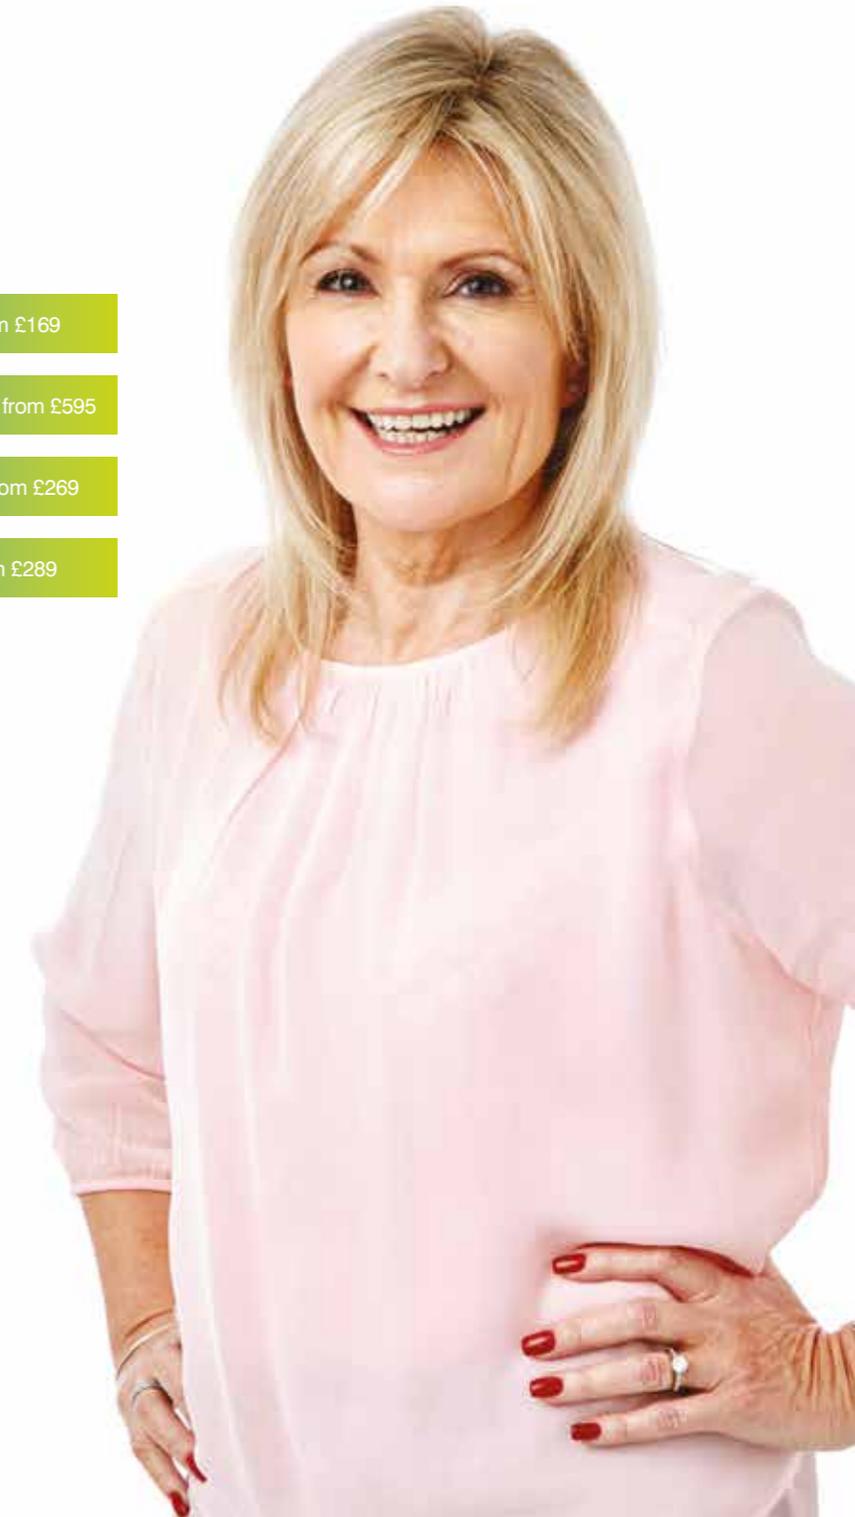

Jawline lift from £289

Tell us more about the results

I'm so pleased with the results, I feel so happy my face looks smoother, healthier and fresh. Everyone keeps saying to me “you look well” or “your skin looks glowing”. It's great that people can instantly tell I look better but they don't realise I've had wrinkle-relaxing injections and dermal fillers because the results look so natural. I feel great!

Doctor's comments

Karen has a lot of character in her face and also has a lovely warm smile which we wanted to protect. She had volume loss around her eyes, and chin and cheeks. What we did with her treatment was gently soften her frown and revolumise around the eyes, cheeks and chin. This has highlighted her natural beauty, whilst preserving her character.

Life. Vitality.

Feeling good about yourself.

When I started SkinViva I wanted to build an organisation to be proud of and the only way to do that is create something that provides real life-enhancing value to the people it serves. There can be no greater job satisfaction than really understanding someone who has come to you for help and then using our world-class skills to solve their problems and so enrich their lives.

Eight years ago I came across a quote that freed me to focus on what really matters, "A successful business is composed of a group of people who make life better for another group of people". This ethos sits very comfortably with my GP background and it's why at the heart of all we do is the question, "How can we make life better for our patients?" I want to provide our patients with the best doctors who want to do the best possible treatments to make them as happy as possible and I believe this ethos is obvious to anyone who comes to us but I can't wait to keep getting better too!
